

COP 4530 - Data Structures, Algorithms and Generic Programming

Section 003 | Fall 2026 | 3 credits
Instructor: Dr. Alice Nakamura (a.nakamura@example.edu)
Meeting pattern: MWF 10:00-10:50, Love Building 301
Office hours: Wednesdays 1:00-3:00pm

Grading

Category	Weight	Count	Drop Lowest
Exams	40%	2	0
Problem Sets	20%	10	2
Programming Projects	25%	3	0
Final Exam	15%	1	0

Course Schedule

Date	Topic	Due
Sep 4	Asymptotic analysis	Problem Set 1
Sep 18	Linked lists	Problem Set 2
Oct 2	Trees and traversal	Project 1
Tuesday, October 14	Midterm Exam 1	Midterm Exam 1
Oct 30	Hash tables	Problem Set 5
Nov 13	Graph algorithms	Project 2
Nov 20	Midterm Exam 2	Midterm Exam 2
Dec 4	Review	Project 3

Course Policies

Attendance is not graded, but you are responsible for all material presented in class.

Late work: assignments lose 10% per day late, up to a maximum of three days. After three days, no credit is given.

Group work: Programming Projects 2 and 3 are completed in pairs.

Final exam: cumulative. See the university final exam schedule for the date and time.

AI policy: Use of generative AI tools is permitted provided you disclose such use in a comment at the top of each submitted file.

Required text: Weiss, Data Structures and Algorithm Analysis in C++, 4th ed. ISBN 978-0132847377.
Approximately \$120.
